

# CITRUS TREES 2017

## GRAPEFRUIT

**BLOOMSWEET**- Large, sweet pale fleshed fruit with yellow skin, a cross between Pommelo and a sour orange, easy to peel.

**RUBY RED**- The pink-red flesh has a sweet flavor with a hint of tartness. Ripens November-May.

## LEMONS

**EUREKA FROST**- Medium sized tree. Large, juicy lemons with very few seeds.

**NEW ZEALAND LEMONADE** – Sweet, juicy fruit actually tastes like lemonade. Has distinctive black branches.

**PONDEROSA**- Small tree, fruit is extra-large with a thick rind, very prolific.

**IMPROVED MEYERS**- Compact tree, medium to large, thin yellow/orange skin, fruit has delicious lemon/orange flavor and is very juicy.

## LIME

**KEY LIME**- Small tree, fruit is thin skinned with a few seeds.

**MEXICAN LIME**- Thorny, small tree, heavy bearer of very aromatic, juicy, acidic fruit.

## OTHER ORANGES

**NULES CLEMENTINE**- The “Clementine De Nules” tree produces mandarin-type clementines of small to medium size with, a very thin rind, smooth and glossy appearance, of red-orange color. The fruit is juicy with a deep-orange flesh speckled with medium-sized seeds. Great as a patio tree.

\***VALENCIA, RHODE RED** – has large, dark fleshed fruit, richly flavored, juicy and nearly seedless, ripens mid to late spring into summer.

## SATSUMA

\***DOBASHI BENI**- Limb-sport of Owari, fruit is deep orange/reddish in color, sweet, good quality, ripens in November.

**ARCTIC FROST**- This small, spreading evergreen tree is slightly more cold tolerant than the other varieties. Can tolerate 10 °F and grows 8-12' in ground and 6' in a container.

**MIHO**- Cold hardy, sweet and seedless, ripens late September to early October.

**ORANGE FROST**- These small, spreading evergreen trees are cold tolerant to 15 °F and grow 8-12' in the ground and 6' in a container. Juicy, delicious, nearly-seedless and easy-peeling fruit and it is also on its own root system.

**OWARI**- Cold hardy with a medium sized fruit, sweet & juicy, less acidic, seedless, easy to peel, ripens Nov. to December.

**OWARI FROST** – Old variety, very cold tolerant, medium size fruit, rind is thin and easy to peel, tender melting orange flesh, sub acid, with rich flavor. Matures early November-December, does not hold well on tree but stores well when picked promptly. Medium-small tree, vigorous, slow-growing and spreading tree; very productive.

**SETO** - Large fruit with red/orange skin and orange flesh. Fruit ripens in October.

**Protect citrus below 25°**

**Cold tolerance for citrus describes conditions above 20°**

**\*Denotes new Texas A&M Varieties**
